

# INDUSTRIAL COOKWARE

[www.boztepe.com](http://www.boztepe.com)

# ABOUT US

We have been operating in the field of kitchen equipment production since 1973. In 1991, we started production in our own factory with our "Boztepe" brand.

We produced items such as pressure cookers, household pots, coffee pots and teapot sets in our factory at first, In 2002 we expanded our product range by starting the production of industrial pots, pans and containers from 1 liter to 150 liters.

# OUR VISION

It is our strict policy to provide high standard and high quality service.

Honesty is at the forefront of our relationship with our customers.

# SUSTAINABILITY

With our mission of being a company that "respects people and the environment", we give priority to ensuring occupational safety and protecting the environment and animals.

We protect the green for a better future. It is our priority plan to switch to the use of renewable energy to further improve our impact on our planet, animals and humans.
